

Be Part of a Winning Team

AMBUCS is dedicated to creating mobility and independence for people with disabilities. As part of a national grassroots effort, our network of volunteers strives to empower others and make the world a more accessible place. Our members perform this mission by providing AmTryke® therapeutic tricycles to individuals who are unable to operate traditional bikes, awarding scholarships to therapy students who are passionate about serving the disabled community, and participating in many forms of community service. Since 1922, AMBUCS members have been working "Shoulders Together" all across this nation to help those less fortunate.

Improve The World Around You

Service to others is what AMBUCS is all about. AMBUCS provides fun, innovative service opportunities for

people who want to help their community but do not necessarily have a lot of time to do so.

By working together, AMBUCS volunteers combine their individual strengths and maximize their spare time. As you work with volunteers, you'll contribute to chapter activities and goals, and you'll learn new skills that can pay lasting dividends in your personal and professional life. Plus, you'll have the opportunity to make valuable contacts and develop leadership skills. Supporters of AMBUCS can also make financial donations to help our organization continue to carry out this important mission.

Giving the Gift of Mobility and Independence

Today, one of the leading programs of AMBUCS is the donation of AmTryke® therapeutic tricycles. All across the nation, AMBUCS chapters raise funds to donate AmTrykes to riders who are unable to operate traditional bikes. For more than a decade, these specially designed cycles have provided therapeutic benefits to both children and adults, while enhancing their quality of life.

AmTrykes can be hand and/or foot-powered and will accommodate riders of all sizes and ages. They help improve fitness, coordination, increase self-esteem and, most importantly, are very fun to ride!

Many AMBUCS chapters also are active in building wheelchair ramps to make homes accessible and creating universal playgrounds that can be used by all children regardless of disability. If there's a way to help someone gain more mobility and independence in their lives, AMBUCS is always eager to help.

"The AmTryke program is about abilities, not disabilities!"

"We impact the fitness and health of people with disabilities by providing meaningful programs not funded by government or insurance"

Supporting Tomorrow's Therapists Today

The AMBUCS organization has long believed that a great way to serve people with disabilities is to support the future generations of therapists. To date, AMBUCS has provided over \$7 million to educate physical and occupational therapists, speech language pathologists and hearing audiologists. One scholarship can go a long way in creating mobility and independence for people with disabilities, as the clinical practitioner spends a lifetime working with the community of people with disabilities. The AMBUCS Scholars-Scholarships for Therapists program represents the largest single private source of educational grants for therapists in America.
