

Student, Teacher & Parent Guide
Fall 2013

What is Connect 2 Learn?

Enterprise City Schools is committed to moving students and staff forward in a 21st century learning environment. That's why we have committed to allowing students to **Connect 2 Learn** during the school day by allowing them to Bring Their Own Digital Device (BYOD). Our **Connect 2 Learn Learning Initiative** allows students to bring their own digital devices to school to encourage achievement, engagement and developing 21st Century Learners. Enterprise City Schools is preparing for your child's future by implementing this learning initiative. We have committed funding for network upgrades and professional development for teachers and staff to begin to incorporate these digital tools into their daily instruction. With this initiative, and under the direction of classroom teachers, students will be allowed to access our filtered wireless network using their own mobile devices during the school day.

Beginning September 2013, our **Connect 2 Learn Learning Initiative** will be implemented across the district. This initiative will start with six (6) Engaged schools: Enterprise High School, Dauphin Jr. High School, Enterprise Jr. High School, Rucker Blvd. Elementary, Holly Hill Elementary and Hillcrest Elementary. During fall 2013, all other schools, termed Ignite schools, will receive training in project-based learning in preparation for full implementation during the second semester of the 2013-14 school year.

Please know that our first priority of this initiative is to provide a safe and secure environment for your child. This handbook is designed to provide our educational community with guidelines and information to make our **Connect 2 Learn Learning Initiative** successful.

Enterprise City Schools looks forward to continued success for our children as we strive to produce productive citizens that will make a difference in our society.

BYOD Definition

Enterprise City Schools defines BYOD as a privately-owned, Internet capable electronic mobile device that can be used during the school day to increase student engagement and facilitate learning. Under teacher supervision, students may use their own device in the classroom to enhance student learning.

Connectivity & Safety

Enterprise City Schools believes that Internet Safety is of utmost importance. As such, all students who bring devices to school to use as part of the **Connect 2 Learn Learning Initiative** should connect to the BOE-BYOD network. Teachers and administrators will provide students with the password for this network. By using the BOE-BYOD network, this will ensure that BYOD devices have appropriate network filters and comply with the Child Internet Protection Act (CIPA). Students will only use the BOE-BYOD network in school. Any attempt to bypass the network by using 3G or 4G cellular data network will be considered a policy violation resulting in loss of BYOD privileges. Students and parents should be aware that data is being recorded as to sites visited by each device. Additionally, as part of this initiative, teachers will incorporate digital citizenship as part of their instruction.

Security and Damages

Enterprise City Schools is not liable for any device that is stolen or damaged. Ultimately, the responsibility to keep the device secure rests with the individual owner. However, if a device is stolen or damaged, it will be handled through the administrative office similar to other personal artifacts that are impacted in similar situations. Devices will need to be labeled with personal markings to physically identify your child's device from others. Additionally, a protective case for the device is suggested.

Teachers' Role

Teachers are facilitators of instruction in their classrooms. Therefore, they will not spend time fixing technical difficulties with students' personal devices in the classroom. They will educate and provide guidance on how to use a device and troubleshoot simple issues, but

they will not provide technical support. This responsibility will reside at home with parents/guardians. Teachers will regularly communicate information regarding educational applications and suggest appropriate tools that can be downloaded to personal devices at home. Parents will need to assist their children with downloads if they wish to follow teachers' suggestions. **No applications should be downloaded at school without express instruction from the teacher.**

Teachers will present the rules and procedures to the students. Teachers will monitor students to ensure appropriate usage of technology in the classrooms. All activities involving technology will be based upon and support the College and Career Ready Standards.

Enterprise City Schools understands that not every student has his/her own electronic device. To ensure equal accessibility to technology resources, teachers will provide students with technology available within each school. Students will also have the opportunity to work collaboratively. All rules, policies, and procedures will still apply.

Use of Devices

Devices cannot be used, unless directed by school personnel. Students must immediately comply with teachers' requests to shut down devices or close the screen. Students must put away DEVICES when directed by teachers. Students should not use devices in bathrooms or locker rooms.

Students Will...

- bring their devices to school fully charged.
- only use headphones and earphones when directed by school personnel
- not use any technology to harass, threaten, demean, humiliate, intimidate, embarrass or annoy fellow students or others in their community. This unacceptable student behavior, known as cyber bullying, will not be tolerated and will be subject to disciplinary action.
- store their personal devices in appropriate areas (book bags, lockers, etc.)

Parental Permission

Students and parents must both sign the Parent/Student Contract at the end of this document in order for a student to bring his/her personal device to school. If parents choose not to allow their student to bring their device, please be aware that it is the responsibility of the parent to make sure that the student does not bring a device to school.

Student Frequently Asked Questions:

I have my laptop with me in class. How do I get on the Internet now?

Answer: Most laptops or other personal devices (smart phones), will detect a wireless connection when you are near one. Most of the time your technology tool will ask you if you would like to join the network. When prompted, choose BOE-BYOD from the list. Your teacher will have the password. Once you choose this network, you will be prompted to. Read this carefully, so that you know what should be expected.

My laptop is not prompting me to choose a wireless network. Is there another way to connect?

Answer: In the settings menu of your device, there is usually an icon for a network, go to this icon and choose the BOE-BYOD from the list or prompt your computer to look for wireless networks in range. Always consult your tool's owner's manual for exact directions for accessing a wireless network.

I brought my iPad to school to use in the classroom, but my teacher said I couldn't use it in her classroom. Can I still use it?

Answer: The teacher in the classroom is the final say on procedures in the classroom. If he or she asks you not to use your technology tool, then you should follow those directions. Access is only available, not guaranteed for each classroom situation.

I just can't get my laptop to connect to the network. Can I get some help from someone?

Answer: Resources may be available to help you connect to the BOE-BYOD on your campus; however, you will need to consult with a campus administrator for these resources. It is not the responsibility of your teachers or other Enterprise City Schools staff to troubleshoot individual devices during the school day. Check your owner's manual for issues concerning connectivity.

My laptop was stolen when I brought it to school. Who should I contact about this?

Answer: Bringing your own technology tools to school can be useful; however, some risks are involved as well. It is always a good idea to record the device's serial number to have in case of theft. Enterprise City Schools is not responsible for the theft of a device nor are we responsible for any damage done to the device while at school. Any time a theft occurs, you should contact a school administrator to make him/her aware of the offense.

Why am I filtered on my own computer? Shouldn't I be able to see what I want to on my own tool?

Answer: Student filtering is a requirement of all public schools. The Children's Internet Protection Act (CIPA) requires all network access to be filtered, regardless of the tool you use to access it while in a public school. Your laptop or phone is the device, the network you are using while at school belongs to BOE-BYOD and will be filtered.

Am I still held accountable for the Acceptable Use Policy I signed at the beginning of the school year even though this is my own personal computer?

Answer: Yes. The Acceptable Use Policy for Enterprise City Schools remains in effect even when you are using your own laptop, smart phone, iPad etc. Violating the terms of the AUP would be a student code of conduct violation and would be dealt with on the campus with a campus administrator. The AUP is part of the Student Code of Conduct.

Why can't my little brother bring his laptop to school? He is in the 1st grade?

Answer: This semester, we are limiting this privilege to selected Engaged schools and grade levels. Your participation in this initiative will help us determine the best way to carry out this plan on other campuses. We will learn from you and your usage and issues so that in the spring semester we will be able to make the needed changes and add to the program for other secondary users.

Parent/Student Contract

****THIS FORM MUST BE SIGNED AND RETURNED IN ORDER FOR THE STUDENT TO BRING THEIR OWN DEVICE AND ACCESS SCHOOL TECHNOLOGY.**

My parents and I have read and discussed the BYOD HANDBOOK and I, [print student's name] _____ agree that when using my personal device or the school's technology:

- I will only use the technology under school personnel direction.
- I know that misuse of the technology could lead to disciplinary action.
- I will not share any personal information over the Internet.
- I am responsible for my own device.
- School staff is not responsible for any device lost, stolen, or damaged.
- I will adhere to the policies and procedures stated in the Enterprise City Schools Code of Conduct and any local school policies and procedures.

I, [print parent's name] _____

The parent/guardian of the above student, agree to accept all legal and financial obligations which may result from my son/daughter's use of Enterprise City School District's technology and Internet. I understand that school and district personnel are not responsible for personal devices that are lost, stolen, or damaged. I will not hold the school system responsible for inappropriate materials acquired through the Internet. Further, I accept responsibility for the actions of my child.

By signing below, we understand that the use of personal devices to support educational experiences is not a necessity but a privilege. With respect of the rules, this privilege will benefit the learning environment as a whole. When rules are abused, privileges will be taken away.

Here are some suggested devices your child may bring to school:

- Kindle (Standard Kindle has very limited internet access)
- Kindle Fire
- Nintendo dsi
- Android Smart Phone
- iPhone
- Nook
- Wireless Capable Mini-Laptop
- Wireless Capable Laptop
- iPad/iPod Touch
