### *We Believe...*

All students can learn and each child is special. When students set goals and are responsible for their own learning and behavior they will feel successful. Students come to after-school wanting to learn and have fun. It is important for students to learn how to learn because students learn at different rates and times. After-school will be a safe place for students and staff.

### *We Believe....*

Teachers need to be enthusiastic about learning and positive toward students. High expectations increase student success. Thinking, interpersonal and communications skills need to be integrated into all activities.

### *We Believe....*

Parents need to help by holding students accountable and helping them be responsible for their own learning. The skills and attitudes learned in the after-school program will make the community a better place for all. Communication between the home and after-school should be open, honest, and frequent. Staff, students and parents working together will give all students the best chance to succeed. Parents should feel welcome and involved in our after-school program.
