

## Habersham County Schools Gifted Referrals

January is Gifted Education Month in Georgia and is also Gifted Referral Month for Habersham County Schools. Individuals wishing to refer a student will need to complete a Gifted Program Referral Form, a Student Talent Survey Form, and samples of student work that demonstrate high ability or creativity. A team of educators will review available student data and referral information to determine if formal evaluation for gifted services is warranted.

Habersham County Schools' gifted services include enrichment studies for elementary students at the Discovery Center complemented in some elementary classrooms by cluster grouping service in appropriate content areas; advanced content provided through Honors courses in grades six through twelve; and Advanced Placement (AP) and dual enrolment courses for students who wish to pursue college-level studies in high school.

Referral forms may be accessed from the Gifted Program website found under Departments on the Habersham County Schools website ([www.habershamschools.com](http://www.habershamschools.com)). Forms may also be requested at the main office of the student's elementary or middle school, by email at [mcantrell@habershamschools.com](mailto:mcantrell@habershamschools.com), or by phone at 706-754-2110, Ext 128. The deadline for the submission of forms is Friday, January 31.
