

East Hamilton

CLIMB Institute- Business and Entrepreneurship Hybrid

The CLIMB Institute: The Canes Leadership Institute of Marketing and Business

Pathways: Business and Entrepreneurship Hybrid

Future Ready Institutes Highlights:

- ★ Small Learning Communities - Students will be a member of a smaller learning community, or “school within a school” containing students all with similar career interests. Students will take a battery of business, marketing, accounting, management, entrepreneurship, and either a culminating experience in Virtual Enterprise or work based-learning. CLIMB’s Hybrid pathway allows students to get the best from two traditional CTE pathways.
- ★ Engaging Learning Opportunities - Students will be engaged in unique project based learning opportunities, hands on learning as well as instruction from an expert staff with real world connections around the career theme. The CLIMB Institutes’ faculty features professionals with real work world experience, connections to professionals in the community, and a supportive atmosphere will excite the program with the best possible preparation for an entrance to the work world, a two year collegiate, or a four year collegiate experience. Students will complete a capstone project as an exhibit of their learning.
- ★ Business and Community Partnerships - Institutes will be connected to local business and community partners. These partnerships will allow for opportunities for students to learn from successful career professionals.
- ★ Post-Secondary Jumpstart - The institute will allow for students to obtain AP-Advanced Placement, Dual Credit, Dual Enrollment, and Certification opportunities. CLIMB students will work with a counselor and experts in the Institute to develop the most appropriate, yet challenging schedule.

Sample Student Schedule
