Soddy Daisy High School
Institute of Tech Start Ups and Web Design

The Institute of Tech Start Ups and Web Design

Pathways:

- Marketing Entrepreneurship
- Web Design

Future Ready Institutes Highlights:

★ Small Learning Communities - Students will be a member of a smaller learning community, or "school within a school" containing students all with similar career interests.

★ Engaging Learning Opportunities - Students will be engaged in project based learning opportunities, hands on learning as well as instruction with real world connections around the career theme.

★ Business and Community Partnerships - Institutes will be connected to local business and community partners. These partnerships will allow for opportunities for students to learn from successful career professionals.

★ Post-Secondary Jumpstart - The institute will allow for students to obtain dual credit and dual enrollment opportunities. Also, students will have the opportunity to earn work ready credentials to give them an advantage for life after high school.
