

Not-so-Common Sense Internet Tips

Preview all content before you display anything to students!

You have the ability to freeze or mute the projection so students cannot see what you are viewing on your teacher workstation- use these features!

Be wary of inappropriate advertisements that might be on the page you are viewing.

Use discretion when navigating on the internet. Anywhere you go or anything you type/share can be tracked.

Don't share personal information.

Don't air your dirty laundry.

If you feel the need to hide the site you are viewing, you probably shouldn't be viewing it at work.

Customize your security settings. *Know what other people can see on your social networking sites.

Be sure to logout of your accounts. Do not just click "close" or the "X," actually LOGOUT. This protects your account and avoids potential problems!

Do not allow students to use your teacher workstation.
