

## Permission Slip for Reproductive Health Class, Part 1

Part 1 of this class, beginning in October, is about appropriate personal relationships and the lessons students should know to prevent them from being taken advantage of in a variety of situations. Safety issues, harassment, bullies, and how to (talk, touch, trust) a person depending on how close they are to you and how long you have known them are taught. The first section ends with puberty and sexual health and hygiene. Please sign this permission form and return it to the school prior to October.

The second part of the class, beginning in January and ending in April, starts with Reproduction. This part of the class includes information about abstinence, having intercourse, condoms, graphic pictures of STDs and AIDS and HIV. Some of the students who greatly benefit from the 1st part of this class are not ready for the 2nd part. However, some students are ready and need to know about all aspects of reproduction and sexual health to stay safe and knowledgeable. There is a separate permission slip for this. Please sign the Part 2 permission slip if you would like your child to participate in the second part of the class on reproduction.

If you have any questions regarding this class, please call Pamela Fry at 989-269-3462.
