

Knob Noster Public Schools Selects Dianna Taylor as New High School Science Teacher

Knob Noster Public Schools has selected Mrs. Dianna Taylor to serve as a science teacher at Knob Noster High School for the 2017-2018 school year.

Mrs. Taylor graduated with a Bachelor's Degree from University of North Georgia in 2015 with teaching certification in both math and science. This past year she taught 7th - 12th grade mathematics in Henry County. Prior to that, she was a substitute teacher in Knob Noster while she was going through the process of transferring her teaching certification from Georgia to Missouri.

Her own experiences as a child have taught Mrs. Taylor the impact a teacher can have on a student. Building relationships with her students, as well as making learning interesting, are personal commitments Mrs. Taylor brings to the students at KNHS. Additionally, Mrs. Taylor understands the unique needs of a military community, being a military spouse herself. Her husband is in the United States Air Force and is stationed at Whiteman AFB.

When asked about the opportunity to serve as a KNHS science teacher, Mrs. Taylor stated, "I absolutely love teaching and helping students grow academically. There is no feeling like watching a student learn and understand new material. I am very excited to join the Knob Noster team!"
