

2017/2018 Asbestos Notification

To all Parents, Guardians and Employees of the
Montezuma Cortez School District RE-1

Colorado Regulation No. 8 requires yearly notification of related asbestos activities that have occurred in the past year or will occur before the next notification. All Montezuma-Cortez RE-1 buildings are in compliance with these regulations.

The Maintenance Department checks all asbestos or presumed asbestos areas every six months. Re-inspections are conducted every 3 years by a certified inspector.

A copy of the management plan can be found in the principal's office of each school building. Asbestos management plans for all schools are also kept in the maintenance building.

The re-training of custodians and maintenance personnel for asbestos awareness is done annually. This is required as long as there is asbestos in any school building where personnel work, per Regulation No. 8.
