Approved by the Murray County Public School Board of Education May 8, 2017

Murray County Public Schools Strategic Planning Process Narrative

The Planning Process

The development of the Murray County Public Schools' Strategic Plan for 2017-2022 began at the February 9, 2017 Board of Education Work session. Members of the Board were presented a planning structure and time line for reviewed. On February 13, 2017, the Board adopted the structure as presented during the regular session.

District leaders collaboratively identified five critical target areas, each of which aligned to high impact organizational improvements: 1) high academic achievement, 2) operational effectiveness, 3) high performing culture and work force, 4) parent and community involvement, and 5) fiscal accountability.

A collaboration between schools, district administration, and students presented the MCPS State of the Schools Address to members of the community on February 28, 2017. This community event served as a bridge between the sun setting plan and the introduction to the new strategic plan development process. A system strategic planning committee consisting of 61 teachers, administrators, parents, students, and community stakeholders were assembled on March 16, 2017 to begin the strategic planning process. The group represented all levels and grades. The group was presented an orientation of the procedures, timelines, and required outcomes. From this full committee, five critical target area sub-committees were established. Teams set meeting calendars, and chairs presented weekly updates to a district leadership team. Throughout the four-month process, committee members reported to and received input from various constituencies.

Sub-committees first established priority goals and then determined measurable objectives for each of those goals. Goals, objectives and action steps, for each of the five critical target areas, were determined using current data. Careful consideration was placed in the analysis of CCRPI, state assessments, surveys, discipline reports, attendance

reports, financial records, and maintenance schedules. Additional attention was directed to the alignment of the AdvancEd Standards and the MCPS Strategic Waiver requirements. After “measurables” were fashioned, the teams determined the actions to consider in reaching those objectives. These actions included timelines, funding requirements, and a means to evaluate progress, and persons responsible.

The Board of Education was updated on the progress of the plan as presented by each of the sub-committee chairpersons on April 6, 2017. Committee chairpersons were asked to share, discuss, and bring forward committee recommendations for change to the Murray County Public School’s vision, mission, and beliefs. On April 27, the full committee met to make final edits to the strategic plan. The strategic planning committee reached consensus on 13 goals, 13 objectives, and 41 action steps. Members also considered options and agreed upon the final recommendations to the vision, mission, and beliefs. In total, there were 4 system planning committee meetings, and a minimum of 15 sub-committee meetings.

At the Board work session on May 4th, 2017, Dr. McFee presented the final draft of the Strategic Plan for Board member review. On May 8th at the regularly scheduled Board action meeting the 2017-2022 Strategic Plan was adopted with a unanimous 7-0 vote.
