New Milford’s Mission Statement

The mission of the New Milford Public Schools, a collaborative partnership of students, educators, family and community, is to prepare each and every student to compete and excel in an ever-changing world, embrace challenges with vigor, respect and appreciate the worth of every human being, and contribute to society by providing effective instruction and dynamic curriculum, offering a wide range of valuable experiences, and inspiring students to pursue their dreams and aspirations.

NEW MILFORD PUBLIC SCHOOLS
New Milford, Connecticut

GRADE LEVEL PROGRAM DESCRIPTION

FIFTH GRADE

Fifth grade students are achieving maturity and are applying many of the locomotor, non-locomotor, and manipulative skills. They begin the process of integrating these skills into a variety of individual and team sports and activities such as, soccer, basketball, volleyball, badminton, softball, cooperative games, bowling, and teambuilding activities that have been modified to their developmental level. Students in fifth grade apply movement principles and concepts to enhance their movement performance, personal fitness, and game strategy and tactics. They self-analyze their own skill and that of their classmates and discuss methods for improving their performance. They begin to demonstrate specialized skills individually, with a partner, and in small and large groups. Vigorous fitness activities are provided through fitness routines, circuits, and games. Through observation and analysis, they are able to critique others as they develop an awareness of the physical, social, and emotional importance of physical activity. Students participate in moderate to vigorous activities for longer periods of time and they continue to improve their fitness levels while they prepare for the fitness testing that happens in sixth grade. Cooperative and team building games allow the fifth grade student to work in pairs and small groups through which they demonstrate competence for working independently and cooperatively, and for exploring and applying the principles of physical activity in both the gymnasium and in out of school activities. Students begin to analyze the differences in individuals and begin to develop an appreciation for those differences. They also demonstrate an evolving appreciation for positive class conduct in accordance with rules and policies, and their ability to problem solve increases with their understanding. They appreciate and participate actively in a variety of physical activities as they prepare to participate in more advanced forms of those activities in the middle school.
### Stage 1 Desired Results

</table>
| T, M, A | The skills and knowledge are coded for introduction, practice, demonstration of critical elements and application in different contexts based upon SHAPE America’s Outcome Skills and Knowledge:  

**E=Emerging:** Students participate in deliberate practice tasks that will lead to skill and knowledge acquisition.  
**M= Maturing:** Students can demonstrate the critical elements of the motor skills and knowledge components of the grade level outcomes, which will continue to be refined with practice.  
**A=Applying:** Students can demonstrate the critical elements of the motor skills and knowledge components of the grade-level outcomes in a variety of physical activity environments. | PERFORMANCE TASK(S):  
By the end of fifth grade, students will demonstrate a variety of fundamental motor skills and movement patterns(M/A) throughout a variety of lead up activities and fitness activities. This will be evidenced through the use of teacher observations, checklists, fitness testing and rubrics throughout the year.  
Refer to the Shape America Document(Standard 1/2) for motor skills and concepts. The Critical Elements of each motor skill will be used to evaluate the student’s level. Also, fitness testing will be used to help establish a baseline for the students goals and what improvements are needed at varying times of the year.  
Suggested Activities: Tag games, fitness, badminton, bowling, basketball, cooperative games, invasion games, volleyball, dance, jump roping, soccer, softball, kickball, hula hooping, golf, scooter games, team building. |
| T, M, A | Formative assessments will use the following code when observing performance during games and activities:  

**E=Emerging.** Students participate in deliberate practice tasks that will lead to skill and knowledge acquisition.  
**M-Maturing.** Students can demonstrate the critical elements of the motor skills and knowledge components of the grade-level outcomes in a variety of physical environments.  
**A=Applying.** Students can demonstrate the critical elements of the motor skills and knowledge components of the grade-level outcomes in a variety of activity environments. | OTHER EVIDENCE:

| T, M, A | The skills and knowledge are coded for introduction, practice, demonstration of critical elements and application in different contexts based upon SHAPE America's Outcome Skills and Knowledge:  

**E=Emerging**: Students participate in deliberate practice tasks that will lead to skill and knowledge acquisition.  
**M=Maturing**: Students can demonstrate the critical elements of the motor skills and knowledge components of the grade level outcomes, which will continue to be refined with practice.  
**A=Applying**: Students can demonstrate the critical elements of the motor skills and knowledge components of the grade-level outcomes in a variety of physical activity environments. | PERFORMANCE TASK(S):  

By the end of fifth grade, students will begin to demonstrate (M/A) positive decision making regarding their health, social interaction, and active participation as it relates to physical activity. This will be evidenced through exit slips, teacher observations, and self-assessments. Using the Shape America Document (standard 4/5 criteria) the students will be evaluated during active participation in a variety of dynamic settings and groups.  
Also, fitness testing will be used to help establish a baseline for the students goals and what improvements are needed at varying times of the year.  
Suggested Activities: Tag games, fitness, badminton, bowling, basketball, cooperative games, invasion games, volleyball, dance, jump roping, soccer, softball, kickball, hula hooping, golf, scooter games, team building. |

| T, M, A | Formative assessments will use the following code when observing performance during games and activities:  

**E=Emerging**. Students participate in deliberate practice tasks that will lead to skill and knowledge acquisition.  
**M-Maturing**. Students can demonstrate the critical elements of the motor skills and knowledge components of the grade-level outcomes in a variety of physical environments.  
**A-Applying**. Students can demonstrate the critical elements of the motor skills and knowledge components of the grade-level outcomes in a variety of activity environments. | OTHER EVIDENCE:

<tbody>
<tr>
<td>T, M, A</td>
</tr>
</tbody>
</table>

**Pre-Assessment**

At the beginning of each topic, the teacher will use questioning and discussion to identify current levels of understanding as it relates to personal and social skills needed for successful participation in a variety of activities.

<table>
<thead>
<tr>
<th>Code</th>
<th>Summary of Key Learning Events and Instruction</th>
</tr>
</thead>
</table>
| T, M, A | -Demonstrating personal responsibility  
-Accepting feedback  
-Working with others  
-Following rules and etiquette  
-Safety  
-Physical activity as a means for health, challenge, enjoyment, and social interaction  
-As part of the daily warm up students will set goals and monitor progress towards meeting CT Health Related Fitness Standards in muscular strength, muscular endurance, flexibility and cardiovascular endurance.  

Suggested Activities: Tag games, fitness, badminton, bowling, basketball, cooperative games, invasion games, volleyball, dance, jump roping, soccer, softball, kickball, hula hooping, golf, scooter games, team building. |  
|  | Progress Monitoring  
Will confer with students  
-to see if there is an understanding of concepts and cues  
Will offer specific individual feedback  
-focus in on the specific areas of performance the students need help with.  
Check-ins (Thumbs up, thumbs down)  
Exit slips  
-identify appropriate ways to handle varying situations that may occur in physical activity environments.  
Observation checklists  
-looking for correct use of problem solving and conflict resolution  
-student checklist for physical fitness standards and personal goals  
Group discussion  
-teacher led discussion about past experiences, prior knowledge, hypothetical situations in physical activity environments. |

National Standards and Grade Level Outcomes for K-12 Physical Education by Shape America |  |
By implementing the National Standards for K-12 Physical Education in your schools you are helping to ensure that all of America's students are benefitting from the skills, knowledge and confidence to enjoy healthy, meaningful physical activity.

### Scope & Sequence for K-12 Physical Education

**Standard 1: Motor skills & movement patterns**
