

Access SBAC Secure Browser on Chromebook

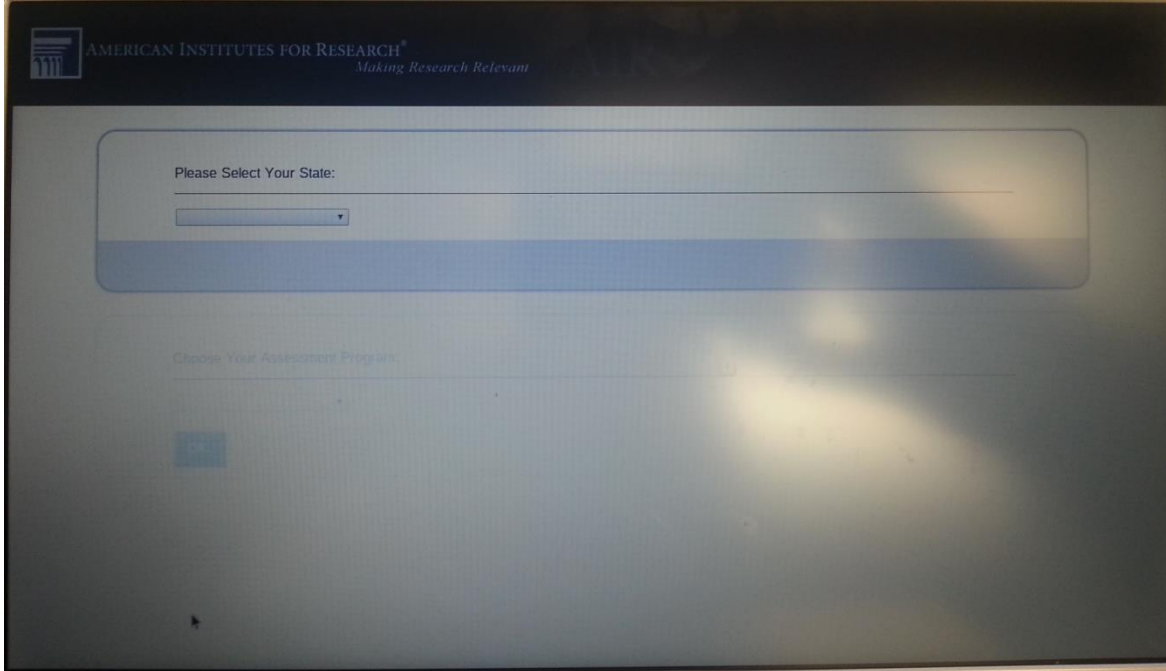

- 1) After booting Chromebook, look for “Apps” at the bottom left corner of the screen. Click on “Apps”

- 2) Clicking on “Apps” will bring up “AIRSecureTest” This is the SBAC browser used for testing, Click on it and it will begin to initialize and load to the start screen.

- 3) The start screen asks to Select Your State. Select Connecticut, then follow the prompts to continue setting up and starting the test.

*****NOTE: Once the SecureBrowser gets to the page asking to select a site, the only way to exit this browser is to complete the test or shutdown the Chromebook.*****
