

## Addendum 4

1. Do you need SFP modules for the 4500-X modular switches?

A1: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

2. If so, how many 1GB fiber, how many 10GB fiber, and how many 1GB Ethernet?

A2: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

3. For the fiber modules, please identify what kind of connections (ie. LC, SC, ST) you are using and whether it is multi-mode or single mode?

A3: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

4. For the 2960, do you require stacking and modules and cables? If so, how many?

A4: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

5. A note about the 2960's:

- a. *The 2960's are not End of Sale yet, but they are certainly heading that direction in the next couple of years. The best replacement for this is definitely the 9200 or 9200L, as it will give a similar price point with a much longer life.*

A5: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

6. Are you open to swapping in the 9200 series or would you prefer to stick with the 2960 model.

A6: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

7. For the Cisco Catalyst 3850-24S, do you require the IP base license or the IP services license

A7: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

8. The IP service license provides for more advanced routing services like dynamic routing protocols.

A8: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

9. For the Cisco Catalyst 3850-24S, do you require a secondary (redundant) power supply?

A9: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

10. Do you want console cables for this equipment? Is so USB or Serial?

A10: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

11. For the C4500X, cooling (fan direction): front to back or back to front?

A11: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

12. For the C4500X, what license do you require – IP Base or IP Services?

A12: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.

13. For the ISR 4331, do you require the advanced security license?

A13: Please reference the RFP documentation for more information. All work is expected to be done to industry standards.
