School Executive's Message: School Purpose Statement

With the 2012-2015 Strategic Plan, Jacksonville Commons Elementary School is poised and positioned to meet and surpass the demands and challenges inherent to a new curriculum, a changing educational landscape, and ultimately a changing world. We will meet these demands by building true Professional Learning Communities across grade levels that focus on student achievement, by using formative assessment that focuses on mastery learning to regroup students for intervention and enrichment on specific skills, by immersing students in a technology rich learning environment that incorporates a global focus, and by building a culture that celebrates academic success, excellent character, leadership skills, and teamwork.

Key Areas of Focus for 2012-2015

- Use of data by Professional Learning Communities to intervene, enrich, and provide differentiated learning opportunities
- Literacy focus with double literacy blocks and technology support
- Continue/expand global partnerships, foreign language offerings, and international emphasis in classrooms
- Integrated teaching opportunities to include Project Based Learning and Impact units.
- Implement Positive Behavior Intervention and Support (PBIS) plan

Key Challenges to Address for 2012-2015

- Increase student proficiency levels in reading and across subject areas and grade levels
- Teaching teachers to integrate content areas, global literacy, technology, and 21st content within and throughout lessons
- Building community involvement

Anticipated Outcomes of 2012-2015 Strategic Plan

JCE anticipates meeting target proficiency goals, building the educational community inside and outside our school walls, and preparing great, young student leaders that are prepared for middle school and ultimately to meet the challenges in the world in which they live.
