School Executive's Message: School Purpose Statement

The Onslow County Learning Center (OCLC) will provide students with the opportunity to make positive changes so that they can become successful at their home-school and within their lives. OCLC will work to produce successful community members that have a brighter outlook in life. With the support of our district leaders, community members, and parents, we are ready for the challenge. We are proud of what we do at OCLC. We also strongly believe that collaborative efforts from all stakeholders make the positive difference in developing "Future Ready" students.

OCLC Key Areas of Focus for 2012-2015

- Project Based Learning site
- Increase Globalization efforts through participation in Rosetta Stone
- 77 % or higher of all students met EVVAS projected scores on state tests
- Continue to improve the percentage of students that return to their home school
- Through encouragement and support, create a school community that will foster retention of highly qualified staff members

OCLC Key Challenges to Address for 2012-2015

- In need of two additional bus drivers
- Limited budget and building space (no gym, library, common area or kitchen)
- All students are "At- Risk" with 85% categorized as low socio-economic
- Higher percentage of students with severe mental diagnosis
- Differentiated instruction is difficult due to absences, ISS and rapidly changing student body

Anticipated Outcomes of 2012-2015 for OCLC Strategic Plan

OCLC will pursue accomplishment of the action steps listed under all five goals in our 2012/2013 Campus Strategic Plan. We are very proud of the improvements and accomplishments that were made campus wide last year. We have developed several action steps designed to implement the common core essential standards and heighten community and parental awareness and participation in OCLC activities. Through revision of this living document, our strategies and efforts can continuously incorporate new, innovative techniques that custom fit our evolving student population.
