

Silverdale Elementary a Leaders in Training School 2012-2015

Mary Mills-McAllister, School Executive

Vision-Utilizing all available resources to create and sustain a system designed to create 21st century leaders.

School Executive's Message: School Purpose Statement

Our purpose is to design and execute an educational process which will educate the whole child. Our staff is committed to implementing instructional strategies designed to provide each child with multiple measures of success. We strive to provide each child with rigor, relevance and relationships. We desire to extend those relationships to the local and global communities. We will seek ways to continuously improve this process and extend our learning to incorporate 21st century learners and thinkers. We are excited to be developing leaders one child at a time.

Key Areas of Focus for 2012-2015

- Instructional Practices that are research based
- Global Awareness & Partnerships

- Digital Citizenship

Key Challenges to Address for 2012-2015

- *Technology-Sustainability, maintenance, upgrades*
- *Economically Disadvantaged Students*
- *Professional Development*
- *Diverse Student Population*
- Funding

Anticipated Outcomes of 2012-2015 Silverdale's Strategic Plan:

Silverdale is committed to continuous improvement. We understand that to provide effective instruction to our students, self evaluation is critical. Our school improvement plan is a living document and Assessment results are shared with all stake holders. Silverdale has deployed its School Improvement Team to provide opportunities for all stakeholders to contribute to the school's growth. The plan is a process that guides the vision of the school, identifies the actions needed to improve student learning, and monitors progress. We use the results to develop personal education plans for students at-risk and to provide staff development. Staff development is designed to enhance student achievement. We are continuously seeking ways to close the achievement gaps that currently exist within our Sub groups. The goals of Silverdale are to prepare all students to be productive and contributing members of a globally competitive society. We will provide an instructional program that motivates our students to become life-long learners, ethical citizens, and leaders. We believe our students should be enthusiastic, creative thinkers who are able to use available resources and technology to solve any problems which they encounter. We strive to educate our students to be sensitive to the environment and contribute their time, energies and talents to improve the quality of life and to sustain the earth's natural resources. We are putting forth a concerted effort with staff, students, and parents to produce students that are 21st century learners. We are leading today to guarantee the future of tomorrow!
