A booth visitor tries to use a remote control to navigate a car through a course while wearing impaired goggles, which gives the effect of drinking.

RESA 8 conducts safe driving program

MARTINSBURG — RESA 8 Adolescent Health program was glad to recently partner with the Eastern Panhandle Safe Community Program as well as the Building Our Lives Drug Free Program to offer information to the community about safe driving habits.

Information was available in the Martinsburg Mall, where tables full of brochures and giveaways could be found as well as fun activities for visitors to participate in.

The feedback heard from observers who visited the table was very positive.

Many expressed feelings of just how important the topic of distracted driving is.

If you have any questions, contact Helen Baker, Region VIII Adolescent Health Coordinator, at RESA 8 304-267-3595 ext. 159 hbaker@access.k12.wv.us.
