

ADDING COMPATABILITY SETTINGS IN IE

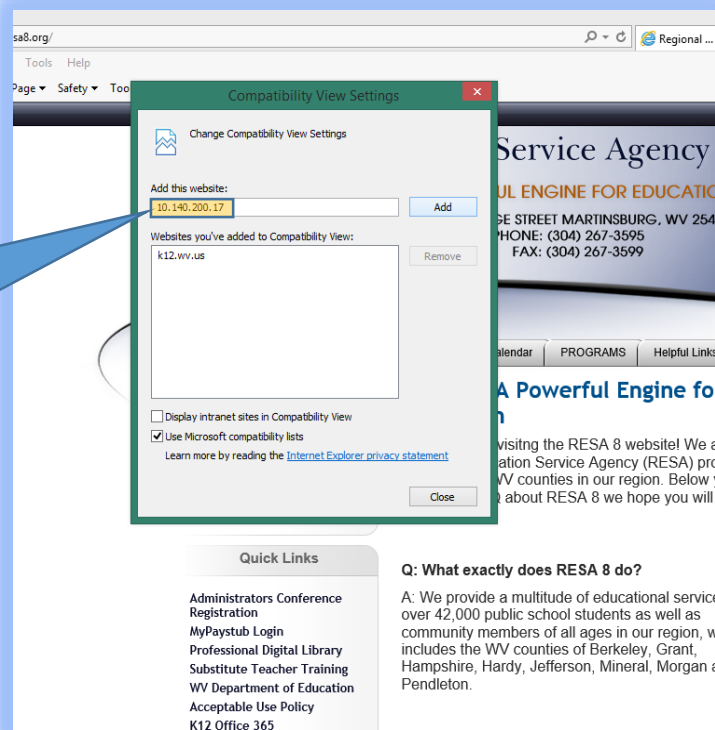

STEP 1: Click on the gear icon in the corner of Internet Explorer.

STEP 2: Choose Compatibility View Settings.

STEP 3: Type k12.wv.us in the box and click Add.

STEP 4: Make another entry for 10.140.200.17 and click Add again.

FINALLY: Both entries should now show in the bottom box under Websites you've added to Compatibility View. Click Close and restart Internet Explorer. You may get a message saying that you need to restart your computer. If so, go ahead and save your files and restart.
