Apprenticeship Randolph is currently taking applications for its first class of apprentices to begin this summer. Students must have an aptitude for working with their hands, solving problems, and thinking creatively. Apprentice wages start at $9 per hour during the first year and increase each year leading up to full-time employment. Students earn an Associate of Applied Science degree (at no cost), 6,400+ hours of on-the-job technical training, and a journeyman certificate, and earnings upward of $120K in four years!

Apprenticeship Randolph is a premier opportunity for students to kickstart a professional career in one of our amazing local industries. Students must attend an open house with a parent/guardian to be eligible to apply. Sign up for an open house and apply at www.apprenticeshiprandolph.com!
