Policy Code: 3225/4312/7320 Technology Responsible Use

The board provides its students and staff access to a variety of technological resources. These resources provide opportunities to enhance learning and improve communication within the school community and with the larger global community. Through the school system's technological resources, users can observe events as they occur around the world, interact with others on a variety of subjects, and acquire access to current and in-depth information.

The board intends that students and employees benefit from these resources while remaining within the bounds of safe, legal and responsible use. Accordingly, the board establishes this policy to govern student and employee use of school system technological resources. This policy applies regardless of whether such use occurs on or off school system property, and it applies to all school system technological resources, including but not limited to computer networks and connections, the resources, tools and learning environments made available by or on the networks and all devices that connect to those networks.

A. EXPECTATIONS FOR USE OF SCHOOL TECHNOLOGICAL RESOURCES

The use of school system technological resources, including access to the Internet, is a privilege, not a right. Individual users of the school system's technological resources are responsible for their behavior and communications when using those resources. Responsible use of school system technological resources is use that is ethical, respectful, academically honest and supportive of student learning. Each user has the responsibility to respect others in the school community and on the Internet. Users are expected to abide by the generally accepted rules of network etiquette. General student and employee behavior standards, including those prescribed in applicable board policies, the Code of Student Conduct and other regulations and school rules, apply to use of the Internet and other school technological resources.

In addition, anyone who uses school system computers or electronic devices or who accesses the school network or the Internet using school system resources must comply with the additional rules for responsible use listed in Section B, below. These rules are intended to clarify expectations for conduct but should not be construed as all-inclusive.

Before using the Internet, all students must be trained about appropriate online behavior as provided in policy 3226/4205, Internet Safety.

All students and employees must be informed annually of the requirements of this policy and the methods by which they may obtain a copy of this policy. Before using school system technological resources, students and employees must sign a statement indicating that they understand and will strictly comply with these requirements and acknowledging awareness that the school system uses monitoring systems to monitor and detect inappropriate use of technological resources. Failure to adhere to these requirements will result in disciplinary action, including revocation of user privileges. Willful misuse may result in disciplinary action and/or criminal prosecution under applicable state and federal law.

B. RULES FOR USE OF SCHOOL TECHNOLOGICAL RESOURCES

1. School system technological resources are provided for school-related purposes only. Acceptable uses of such technological resources are limited to responsible, efficient and legal activities that support learning and teaching. Use of school system technological resources for commercial gain or profit is prohibited. Student personal use of school system technological resources for amusement or entertainment is also prohibited. Because some incidental and occasional personal use by employees is inevitable, the board permits infrequent and brief personal use by employees so long as it occurs on personal time, does not interfere with school system business and is not otherwise prohibited by board policy or procedure.

2. Under no circumstance may software purchased by the school system be copied for personal use.

3. Students and employees must comply with all applicable laws, including those relating to copyrights and trademarks, confidential information, and public records. Any use that violates state or federal law is strictly prohibited. Plagiarism of Internet resources will be treated in the same manner as any other incidents of plagiarism, as stated in the Code of Student Conduct.

4. No user of technological resources, including a person sending or receiving electronic communications, may engage in creating, intentionally viewing, accessing, downloading, storing, printing or transmitting images, graphics (including still or moving pictures), sound files, text files, documents, messages or other material that is obscene, defamatory, profane, pornographic, harassing, abusive or considered to be harmful to minors.

5. The use of anonymous proxies to circumvent content filtering is prohibited.

6. Users may not install or use any Internet-based file sharing program designed to facilitate sharing of copyrighted material.

7. Users of technological resources may not send electronic communications fraudulently (i.e., by misrepresenting the identity of the sender).

8. Users must respect the privacy of others. When using e-mail, chat rooms, blogs or other forms of electronic communication, students must not reveal personal identifying information, or information that is private or confidential, such as the home address or telephone number, credit or checking account information or social security number of themselves or fellow students. For further information regarding what constitutes personal identifying information, see policy 4705/7825, Confidentiality of Personal Identifying Information. In addition, school employees must not disclose on school...
requests. School system personnel shall monitor online activities of individuals who access the Internet via a school-owned policy and applicable laws and regulations, protecting the school system from liability, and complying with the public records may include, but are not limited to, maintaining system integrity, security, or functionality, ensuring compliance with board resources owned or issued by the school system, whether the resources are used at school or elsewhere, and even if the use is personal purposes. Users should not assume that files or communications created, transmitted, or displayed using school resources owned or issued by the school system only with prior approval by the superintendent or designee.

11. Users are prohibited from engaging in unauthorized or unlawful activities, such as "hacking" or using the computer network to gain or attempt to gain unauthorized or unlawful access to other computers, computer systems or accounts.

12. Users are prohibited from using another individual's ID or password for any technological resource without permission from the individual. Students must also have permission from the teacher or other school official.

13. Users may not read, alter, change, block, execute or delete files or communications belonging to another user without the owner's express prior permission.

14. Employees shall not use passwords or user IDs for any data system (e.g., the state student information and instructional improvement system applications, time-keeping software, etc.) for an unauthorized or improper purpose.

15. If a user identifies a security problem on a technological resource, he or she must immediately notify a system administrator. Users must not demonstrate the problem to other users. Any user identified as a security risk will be denied access.

16. Teachers shall make reasonable efforts to supervise students' use of the Internet during instructional time.

17. Views may be expressed on the Internet or other technological resources as representing the view of the school system or part of the school system only with prior approval by the superintendent or designee.

C. RESTRICTED MATERIAL ON THE INTERNET

The Internet and electronic communications offer fluid environments in which students may access or be exposed to materials and information from diverse and rapidly changing sources, including some that may be harmful to students. The board recognizes that it is impossible to predict with certainty what information on the Internet students may access or obtain. Nevertheless, school system personnel shall take reasonable precautions to prevent students from accessing material and information that is obscene, pornographic or otherwise harmful to minors, including violence, nudity, or graphic language that does not serve a legitimate pedagogical purpose. The superintendent shall ensure that technology protection measures are used as provided in policy 3226/4205, Internet Safety, and are disabled or minimized only when permitted by law and board policy. The board is not responsible for the content accessed by users who connect to the Internet via their personal mobile telephone technology (e.g., 3G, 4G service).

D. PARENTAL CONSENT

The board recognizes that parents of minors are responsible for setting and conveying the standards their children should follow when using media and information sources. Accordingly, before a student may independently access the Internet, the student's parent must be made aware of the possibility that the student could obtain access to inappropriate material while engaged in independent use of the Internet. The parent and student must consent to the student's independent access to the Internet and to monitoring of the student's internet activity and e-mail communication by school personnel.

In addition, in accordance with the board's goals and visions for technology, students may require accounts in third party systems for school related projects designed to assist students in mastering effective and proper online communications or to meet other educational goals. Parental permission will be obtained when necessary to create and manage such third party accounts.

E. PRIVACY

Students, employees, visitors, and other users have no expectation of privacy in anything they create, store, send, delete, receive, or display when using the school system's network, devices, Internet access, email system, or other technological resources owned or issued by the school system, whether the resources are used at school or elsewhere, and even if the use is personal purposes. Users should not assume that files or communications created, transmitted, or displayed using school system technological resources or stored on servers or on the storage mediums of individual devices will be private. The school system may, without notice, (1) monitor, track, and/or log network access, communications, and use; (2) monitor and allocate fileserverspace; and (3) access, review, copy, store, delete or disclose the content of all user files, regardless of medium, the content of electronic mailboxes, and system outputs, such as printouts, for any lawful purpose. Such purposes may include, but are not limited to, maintaining system integrity, security, or functionality, ensuring compliance with board policy and applicable laws and regulations, protecting the school system from liability, and complying with the public records requests. School system personnel shall monitor online activities of individuals who access the Internet via a school-owned
F. USE OF PERSONAL TECHNOLOGY ON SCHOOL SYSTEM PROPERTY

Each principal may establish rules for his or her school site as to whether and how personal technology devices (including, but not limited to smart phones, tablets, laptops, etc.) may be used on campus. Students’ devices are governed also by policy 4318, Use of Wireless Communication Devices. The school system assumes no responsibility for personal technology devices brought to school.

G. PERSONAL WEBSITES

The superintendent may use any means available to request the removal of personal websites that substantially disrupt the school environment or that utilize school system or individual school names, logos or trademarks without permission.

1. Students

Though school personnel generally do not monitor students' Internet activity conducted on non-school system devices during non-school hours, when the student’s online behavior has a direct and immediate effect on school safety or maintaining order and discipline in the schools, the student may be disciplined in accordance with board policy (see the student behavior policies in the 4300 series).

2. Employees

Employees’ personal websites are subject to policy 7335, Employee Use of Social Media.

3. Volunteers

Volunteers are to maintain an appropriate relationship with students at all times. Volunteers are encouraged to block students from viewing personal information on volunteer personal websites or online networking profiles in order to prevent the possibility that students could view materials that are not age-appropriate. An individual volunteer’s relationship with the school system may be terminated if the volunteer engages in inappropriate online interaction with students.

H. TEXTING

Employees, non-Randolph County School employed but support personnel (i.e. lay coaches, band coaches, boosters, club sponsors, etc.) and school volunteers should not send text messages to individual students. When text messaging is used for school-related matters, the following rules apply:

1. Employees, non-instructional support and school volunteers shall not send text messages to elementary and middle school students;

2. Employees, non-instructional support and school volunteers shall use group texting websites (such as "cel.ly", "Remind 101") to communicate with high school students via text message;

3. Employees, non-instructional support and school volunteers must invite parents to join the group texting website;

4. Employees, non-instructional support and school volunteers may not communicate with high school students via text message unless the student’s parent or guardian has provided a phone number for texting that is listed in the NC Student Information System/ HomeBase database; and

5. Employees, non-instructional support and school volunteers may only text high school students on the number listed in the NC Student Information System/Home Base database; and

6. Employees, non-instructional support and school volunteers must keep a record of all texts sent to and from students.

As a general rule, student record information protected by the Family Education Rights and Privacy ACT (FERPA) and personnel records confidential pursuant to state law should not be sent via email, text, or facsimile unless sent in a secure manner.
