For the last few weeks, BCS students have enjoyed a virtual tour through Ancient Egypt. Social Studies classes have explored the geography, religion, achievements, politics, economics, and social structure of the kingdoms of Ancient Egypt. Throughout this study, students have applied the literacy skills they are learning in Language Arts class as they read and understand texts to gather information.

As a final project, students had a choice of four different options to create including a pyramid and the inside of a tomb. In addition to creating this artifact, students were required to write a brief piece describing and explaining the significance of what they created.

A few projects are pictured here.
