Delivering Spring to the Career Center!

Community Based Instruction

The Career Center of the SCESC is open and available for use as a resource for Community Based Instruction. We invite case managers and district personnel to utilize our ShopRite facility to introduce shopping skills, retail mathematics, and daily living skills to your in-district students. Please contact us to schedule a visit so your students can experience shopping in a stocked grocery store, while having the structure of a contained classroom environment. Your students will learn valuable skills related to everyday tasks in our ShopRite Supermarket Program.

Open House Week

The Career Center of the SCESC will be hosting Spring Open House Week from **April 11–15, 2016**. We welcome you to visit any time from **10:00 – 11:45 AM** each day.

District personnel and parents of prospective students are invited to attend. Attendees will be able to visit the Career Center's academic classrooms, as well as our ShopRite Supermarket Careers learning lab, Graphic Arts & Design Shop, and Power Engine Technology Facility.

The Career Center is equipped to educate and support students of all academic levels, due to our small class sizes and intensive

interventions and supports. Our Counselling Staff provide additional support to our students and families during the school day.

ShopRite Delivery

Students in the ShopRite Program experienced first-hand the process of unloading a tractor trailer truck in order to bring new products into the grocery store. The students unloaded the truck, then unpacked each new item onto the store shelves. Students learned to input new scan codes, and price each item according to ShopRite standards. New items are on sale in the store now. Come and shop with us, and enjoy our coffee bar!
