

Scott County School District Local Wellness Policy

2017-2018

Office of Healthy Schools

Local School Wellness Policy

(Originally developed May 2005, updated June 2015)

To support the relationship between student health and academic achievement, the 2014 Mississippi Public School Accountability Standards (Standard 17.5.1) and the Child Nutrition and WIC Reauthorization Act of 2004 (PL # 108-265) requires each local school to establish a local school wellness policy. Mississippi Code of 1972, Annotated Section 37-13-134 requires the recommendations made by a school health council to be based on a coordinated approach to school health. This guide has been revised, as of June 2014, to support local schools in their development to meet state and federal requirements. The Office of Healthy Schools is committed to supporting academic achievement through school health programs that ensure every child has the opportunity to be fit, healthy and ready to succeed.

The following minimum requirements are established by the federal legislation. This law places responsibility of developing a school wellness policy at the local level, so individual needs of each school can be addressed most effectively. States and schools may choose to require or add additional components. Specifically, the federal legislation requires:

- **Goals for nutrition education, physical activity, and other school-based activities that are designed to promote student wellness in a manner that the local education agency determines is appropriate;**
- **Nutrition guidelines selected by the local educational agency for all foods available on each school campus under the local educational agency during the school day with the objectives of promoting student health and reducing childhood obesity;**
- **Assurances that guidelines for reimbursable school meals are not less restrictive than the regulations issued by the USDA;**
- **Ways of measuring how well the school wellness policy is being implemented, including designation of one or more persons at each school with operational responsibility for ensuring that the school is meeting the policy;**
- **Involvement of parents, students, representatives of the school food authority, the school board and school administrators, and the public, in developing the wellness policy.**

To assist Mississippi schools in complying with these state and federal requirements, the Mississippi Department of Education (MDE) has identified a three-step approach to developing an effective local school wellness policy, along with sample language for a policy. This Local School Wellness Policy Guide for Development includes all the minimum requirements necessary to comply with the federal law, as well as existing Mississippi statutes and standards. It also offers additional policy options that schools are encouraged to utilize in developing their specific goals.

School Wellness Policy Guide

The purpose of this guide is to provide sample language for schools to use in developing their own local policies. It is based on existing state requirements and USDA guidance as of June 2013, and on the experiences of successful schools in Mississippi and around the United States.

This guide contains both minimum requirements and optional policy statements. **The minimum requirements, based on federal and state legislation and standards, must be included in any School Wellness Policy adopted by Mississippi schools.** Schools are encouraged to review the optional policy statements, based on the best practices from other schools, and to adopt those that meet the goals of their schools and communities.

This guide is not intended for adoption in its entirety by schools, unless they so choose. It is intended for schools to use as a tool in drafting their own policies. With the exception of the minimum requirements, schools may choose to alter this guide, based on community input, to address local concerns and meet local needs.

This eight-component model of a coordinated approach to school health, developed by the Centers for Disease Control and Prevention, depicts the importance of leadership, coordination, and partnerships to successfully implement quality school health programs that provide opportunities for all children to be fit, healthy, and ready to succeed.
