

Advanced Placement Computer Science  
Summer Work 2017

---

The summer work provides you with practice using the Java language. You will need to set up access to CodingBat.com. Using CodingBat.com is simple because the programming, running, and testing is all done via a web browser. Your completion status of each exercise in CodingBat.com will be reported at the start of the 2017/18 school year.

Before using CodingBat.com, the following steps must be taken:

1. Access the link <http://codingbat.com/>
2. Read the CodingBat.com ABOUT page.
3. Create a CodingBat.com account (by clicking the **create account** link in the upper-right corner of the page) and be sure to include your FULL NAME (last, first -- e.g. Smith, Bob) in the **Name** field
4. Once you have logged into your account, go to the preferences page (by clicking the **prefs** link in the upper-right corner of the page) and share your account with me by placing my email in the box:  
ghull@spsd.us

You are to complete the following problems from the **Java, Warmup-1** section:

- sleepIn
- diff21
- nearHundred
- hasTeen
- close10
- monkeyTrouble
- posNeg
- or35
- lastDigit
- sumDouble

If you need to contact me for clarification purposes, I can be reached at [ghull@spsd.us](mailto:ghull@spsd.us)
