From ISBE Licensure Division:

ELIS has been programmed to exempt specific positions from Illinois Administrator Academies for FY16 renewal. **Please share this information with your staff** and with the Google forum groups.

For FY 16 renewal, any educator reported in a position that does not require an administrative endorsement will not be required to complete an AA for this year or any prior year in the cycle. After discussions few regional superintendents, ISBE Legal and Licensure agree that the rules need clarified and we do not want to penalize any educators who are renewing this year and may be surprised to learn they are required to complete multiple IAA's. We do plan to revise rules for clarity in the near future and require any educator holding a position in 1.705 be considered "administrative" and thus needing to complete administrative academies for FY17 renewal and later. EIS position codes are also being condensed and re-worded to help districts with reporting.

Below are positions in 1.705 that require or do not require IAA's for FY16 renewal. If you had previously contacted ISBE about an educator working in one of the "exempt" positions, please check with these educators to ensure IAA's are no longer listed for their renewal this year. All of these educators should be able to successfully renew now. If you find an error, please @isbe.net with the details as soon as possible.

If an educator is incorrectly reported (e.g. reported as a principal but is truly a teacher), please send a letter to ISBE (or to the ROE for upload) that states the individual was incorrectly reported as _____ and the actual position held was _____. We will manually override academies as needed.
