

FACILITIES PLANNING

The School Board is responsible for the regular operation and orderly development of all school facilities. The Board concerns itself with both short and long-range planning.

The superintendent presents to the School Board annually, or as necessary to coordinate with the planning process of the appropriating body, a Capital Improvement Program which includes recommendations regarding timing, location, costs and savings associated with:

- new building requirements
- restoration and renewal of existing school facilities

The superintendent may make recommendations for new buildings and renovations after input concerning facilities utilization, development and closure from a broad based committee representing the staff and community.

Recommendations are supported by data that supports the feasibility and need for construction and/or renovation.
