

USE OF BODY-BUILDING/DIETARY SUPPLEMENTS

The Tyler County Board of Education regards students' health and safety as the primary consideration in establishing policies. As such, this policy is established to assist in the protection of students' health.

Students shall not be permitted to buy, sell, supply, or use any body-building substance, performance enhancer, or dietary supplement on school property. Examples include, but are not limited to the following: steroids, creatine, or appetite suppressants.

Having such substances on school property will subject the individual to disciplinary action, including suspension and/or removal from a team or organization.
