

Mrs. Winesickle's First Grade Class

One of the students' favorite days in the month of February is the 100th Day of School! We did lots of different activities involving the number 100 including reading a 100th Day of School story and writing stories about what we will be doing and what we will look like when we are 100. We played math games, predicted how much of a jar would be filled after adding 100 drops of water, and even created structures with 100 cups, plus much more! It was a busy and exciting day!

Partners playing "Roll the dice to 100" where they had to estimate how many times it will take to roll the die to get to 100, and after playing, had to then count how many times it actually took.

Working in groups to create a 100-cup structure
