

Public Two-Year Colleges

Programs in these schools last from 6 to 24 months and can lead to diplomas, certificates, and associate degrees. Some programs are designed for transfer for credit at four-year colleges and universities. Others are technical programs that teach students specific occupational skills or improve their present job skills.

Financial aid programs administered by two-year public colleges are listed on the following pages in alphabetical order.

Some schools chose not to participate or did not return information in time to be included in this edition of *Affording Higher Education*.
